Because I am a girl I am less likely to go to school Because I am a girl I am more likely to suffer from malnutrition Because I am a girl I am more likely to suffer violence in the home Because I am a girl I am more likely to marry and start a family before I reach my twenties. Eight authors have visited eight different countries and spoken to young women and girls about their lives, struggles and hopes. The result is an extraordinary collection of writings about prejudice, abuse, and neglect, but also about courage, resilience and changing attitudes. Proceeds from sales of this book will go to PLAN, one of the world's largest child-centered community development organisations.

Shortly before his 44th birthday, John Diamond received a call from the doctor who had removed a lump from his neck. Having been assured for the previous 2 years that this was a benign cyst, Diamond was told that it was, in fact, cancerous. Suddenly, this man who'd until this point been one of the world's greatest hypochondriacs, was genuinely faced with mortality. And what he saw scared the wits out of him. Out of necessity, he wrote about his feelings in his TIMES column and the response was staggering. Mailbag followed Diamond's story of life with, and without, a lump - the humiliations, the ridiculous bits, the funny bits, the tearful bits. It's compelling, profound, witty, in the mould of THE DIVING BELL & THE BUTTERFLY.

Tony Ross skillfully presents the problem of bullying, managing to engage sympathy for each side of the story A little boy is wondering why he is bullied by his classmate Peregrine Ffrogg. He asks himself various questions: Is it because he misses his mum? Is it because he still sucks his thumb? Is it because he smells like a pike? Is it because he can't ride a bike? And the questions he asks leads him to a greater understanding of himself and the bully. He comes to the conclusion that Peregrine Ffrogg is unhappy, and jealous of him.

The dissipating multilateral trading system and splintering in a number of trading blocs and arrangements has been one of the most important issues in international economics, particularly after the

establishment of the World Trade Organisation in 1995.

International Edition University Physics aims to provide an authoritative treatment and pedagogical presentation in the subject of physics. The text covers basic topics in physics such as scalars and vectors, the first and second condition of equilibrium, torque, center of gravity, and velocity and acceleration. Also covered are Newton's laws; work, energy, and power; the conservation of energy, linear momentum, and angular momentum; the mechanical properties of matter; fluid mechanics, and wave kinematics. College students who are in need of a textbook for introductory physics would find this book a reliable reference material.

The follies of finance have threatened the stability of the global economy, and the world of finance has become increasingly complex and sophisticated, but also greedy, cynical and self-interested. The Long and the Short of It provides a guide to the complexities of modern finance and explains how to put your finances in the only hands you can confidently trust - your own. In this new, wholly updated edition of The Long and the Short of It, you will learn everything you need to be your own investment manager. You will recognise your investment options, the institutions that try to sell them, and how to distinguish between fact and fiction in what companies say. You will discover the principles of sound investment and the research that supports these principles. Crucially, you will learn a practical investment strategy and how to implement it. Leading economist and hugely successful investor John Kay uses his academic credentials and practical experience to lay out the key principles of investment with characteristic clarity and dry humour. This is the only book about finance and investment anyone needs, and the one book they must have.

Barry Fisher's Techniques of Crime Scene Investigation has long been considered the "bible" of the crime-solving profession, drawing from the author's 40-year career in forensic science, including his time spent as the crime laboratory director for the Los Angeles County Sheriff's Department.
