The hero Sean is only seventeen-years-old, but the serious issues he faces when he falls in love with his new class mate, Katherine, resonate also with older readers. Theirs is a complicated relationship from the start. Readers will appreciate the realistic depiction of the tortured hero's psychological struggle after the heroine ends the relationship, especially when it becomes clear that both young people remain drawn to each other anyway and struggle to regain their balance during the rest of the school year. A refreshing high school romance set in Europe, Flanders, in the early seventies of the previous century with a total lack of stereotyping, that has it all: it's witty, bittersweet, touching and rich in culture and history. The story depicts all the uncertainties and overpowering emotions that come with true young love in a most original and genuine way.

This book is based on an in-depth filmed conversation between Howard Burton and Andy Hoffman, Holcilm Professor of Sustainable Enterprise at the University of Michigan's Ross School of Business and School of Environment and Sustainability. This extensive conversation starts with inspiring insights into how Andy Hoffman became interested in environmental issues when he declined acceptances from graduate school at Harvard and Berkeley and instead worked as a carpenter for several years in Nantucket. Topics include the notions of 'environmental sustainability' and 'big business' which sometimes seem as incompatible as oil and water and ways to make a synthesis a reality by seriously reconsidering the way we currently conduct public policy and even some deep aspects of our current societal values. This carefully-edited book includes an introduction, Clarity vs. Popularity, and questions for discussion at the end of each chapter: I. Building a Career - Getting a lay of the land II. Environmental Evolution - Fringe and mainstream III. Beyond Punditry - The cultural backdrop to climate change IV. Fostering Debate - Engaging, responsibly V. American Exceptionalism? - Discussions on uniqueness VI. Talking the Talk - Communicating science better VII. Breaching to the Choir? - How to make genuine social progress VIII. Energy Renaissance - Government's role IX. Reinventing Sustainability - Imagining the long term X. Surprising Revolutionaries - Idealistic business students XI. Setting Ideals - Towards a North Star XII. Impact - Changing hearts and minds XIII. The Passion Principle - Discovering our calling About Ideas Roadshow Conversations Series: This book is part of an expanding series of 100+ Ideas Roadshow conversations, each one presenting a wealth of candid insights from a leading expert in a relaxed and informal setting to give non-specialists a uniquely accessible window into frontline research and scholarship that wouldn't otherwise be encountered through standard lectures and textbooks. For other books in this series visit our website (<https://ideas-on-film.com/ideasroadshow/>).

This is the exiting sequel to the school code part 1! All your favourite characters are back and are older and wiser for the most part! As Stacey and her friends jump into their final year of high school there are many trials and triumphs, friends to be made and lost, hot new romances! With a surprise new couple. You'll never guess who! Who will Stacey end up with? What about Shannon and Robert? This exiting sequel is certainly set to rival the original! With the old characters returning, new additions to the group in Melbourne and Queensland and of course brand new school code dramas! What will Stacey's decision be as the school code gets more and more out of control and she starts to make new friends and start to realize what's important to herself and to her friends. Will Stacey follow her heart or her popularity and Melbourne friends and boyfriend. Her decision will be set to shock and will change the face of the school code forever! The finale of this exiting sequal is not to be missed! There will be a shock finale that is action packed and sure to shock readers! With all characters getting thrown back together again to finish of the teen portion of the school code! The finale will be full of tears and triumphs action packed, with love and friendships formed and a shock twist that you will never guess! The school code part 2 certainly has many highs and lows, but finishes off the high school part of the school code very well takes the teen and high school years out with a bang.

Trust the dedicated leader in accounting education to transform your accounting course with a time-tested instructional design, enhanced digital solutions, and a comprehensive package to address your contemporary classroom needs and prepare your students for success in the 21st century. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Government is committed to moving to a secure, safe, affordable and low-carbon energy system. This will mean achieving its climate change and renewables targets, including a 34 per cent reduction in CO2 emissions by 2020 (relative to 1990); at least an 80 per cent reduction by 2050; and by 2020 ensuring that 15 per cent of energy comes from renewable sources. This transition will require major investment in modern technologies: to renovate buildings; to provide for the electrification of much of our heating, industry and transport; and to move to cleaner power generation. It will also require major changes in the way energy is used by individuals, industry and the public sector. At the core of the Bill is the need to ensure that, as older power plants are taken offline and electricity demand continues to increase, the UK remains able to generate enough energy to meet its needs. The Energy Bill will: implement the electricity market reforms set out in the white paper 'Planning our electric future ...' (Cm. 8099. ISBN 9780101809924); clarify the role of the regulator, Ofgem; establish an Office for Nuclear Regulation; make changes to the offshore transmission regulatory framework; and make provisions for the potential sale of Government Pipeline and Storage System. This document contains a description of the Bill's aims, the draft Bill and explanatory notes, together with a summary impact assessment.
