mSAP: The New PCB Manufacturing Imperative for 5G Smartphones October 23, 2017 Modified semi-additive processes and advanced manufacturing techniques are enabling high-density interconnects in smartphones at lower costs and faster production speeds.

mSAP: The New PCB Manufacturing Imperative for 5G ...

MSAP was registered as a charity in 1995 to provide advocacy to members of all communities living in the Medway and Swale local authority areas and who were experiencing mental distress. We understand the barriers preventing users of mental services from having their voices heard, rights secured and obtaining the services they need.

Services - Medway and Swale Advocacy Partnerships

The MSAP-Ireland assessment is developed and independently administered by ACER (Australian Council for Educational Research), who have an excellent international reputation and a track record in the development, management and research of selection tests for undergraduate programmes. The MSAP-Ireland assessment consists of the following:

mSAP: The New PCB Manufacturing Imperative for 5G ...

An alternative to the subtractive process is the mSAP (semi-additive fabrication process), which enables a transition to much finer circuit geometries. With mSAP, a much thinner copper layer is coated onto the laminate, and plated in the areas where the resist is not applied—thus, the “additive” nature of the process.

mSAP: New PCB Technology to be used in 5G Smartphone ...
