The T-JTA measures common personality variables or attitudes and behavioral tendencies, which influence personal, social, marital, parental, family, scholastic and vocational adjustment.

This study examined the relationship of the Taylor-Johnson Temperament Analysis (T-JTA) scores and demographic information of compliance and non-compliance with treatment of individuals who were court referred as a result of driving under the influence of intoxicants (DUII). the study consisted of 239 (118 compliant males; 82 non-compliant males; 22 compliant females; 7 non-compliant females) subjects referred to Tillamook Counseling, Inc. over a six year period for drunk driving offenses. the first hypothesis held there is no significant difference between the Taylor-Johnson Temperament Analysis profiles of Compliant DUII clients and the Taylor-Johnson Temperament Analysis profiles of Non-compliant DUII clients which would make the T-JTA test a possible prognostic tool to determine risk of non-compliance during treatment. the second hypothesis held that both groups are from the same population, and there is no significant difference between attributes (i.e., age, race, marital status, family history, alcohol & drug use history, BAC level at time of arrest, social contacts, occupation, education, frequency of use, age first started, prior attempts to stop drinking, medical complications, psychosocial stressors, financial status, past legal history, family history of alcohol/drug use, level of denial) of Compliant DUII clients and those of Non-compliant DUII clients which may be factors in risk of non-compliance versus compliance during treatment. For males, all Taylor-Johnson scales showed a significant relationship (p \$

A comprehensive and practical approach to the world of marriage,couples, and family counseling Esteemed academics David Capuzzi and Mark D. Stauffer presentthe theory, research, and real-life practice of today's counselorsand therapists in family therapy settings. Aligned with the Councilfor Accreditation of Counseling and Related Educational Programs(CACREP) and Commission on Accreditation for Marriage and FamilyTherapy Education (COAMFTE), this useful text covers foundationalteaching important to readers, but also critical modern topics notincluded in other texts, such as sexuality, trauma, divorce,domestic violence, and addictions, filial play therapy, and usingcommunity genograms to position culture and context in familytherapy. With a unique focus on practical applications, the bookdiscusses the major family therapy theories, and provides graduatestudents and post-graduate learners in counseling, mental health,and behavioral health fields the skills and techniques they need tohelp couples and families as part of their work in a variety ofhelping environments. Each chapter contains case studies andanecdotes that help readers think critically about the issues theyare likely to deal with as clinicians. Written by recognized and respected contributors, this bookhelps readers see the connection between what they know and whathappens in couples and family counseling sessions. Readerswill: Learn the knowledge and skills essential to family therapy Understand the history, concepts, and techniques associatedwith major theories Examine the key issues specific to couples work, with relevantintervention Explore solutions to the complexities generated by specialissues Discusses the modern realities of family, diversity andculture, and systemic contexts Family and couples counseling presents a complex interplay ofvarious factors inherent to each individual, the dynamic interplaybetween each person's issues, and the outside influences that shapebehavior. Foundations of Couples, Marriage, and FamilyCounseling helps readers sort out the complexity and guideclients toward lasting resolution.

"With an emphasis on the American West, Eugenic Nation explores the long and unsettled history of eugenics in the United States. This expanded second edition includes shocking details that demonstrate that the story is far from over. Alexandra Minna Stern explores the unauthorized sterilization of female inmates in California state prisons and ongoing reparations for North Carolina victims of sterilization, as well as the topics of race-based intelligence tests, school segregation, the U.S. Border Patrol, tropical medicine, the environmental movement, and opposition to better breeding. Radically new and relevant, this edition draws from recently uncovered historical records to demonstrate patterns of racial bias in California's sterilization program and to recover personal experiences of reproductive injustice. Stern connects the eugenic past to the genomic present with attention to the ethical and social implications of emerging genetic technologies"--Provided by publisher.

An AWOL reduction program, which utilized peer counseling, was conducted with two randomly selected companies from a mechanized infantry battalion at Fort Carson, Colorado. Two randomly selected companies from the same brigade served as static control units. Employing the Taylor-Johnson Temperament Analysis (T-JTA), AWOL-prone soldiers were identified and were counseled initially by the unit chaplain and subsequently by platoon leaders. Platoon leaders identified situational aspects of AWOL-prone soldiers and interacted as mediators between environmental situations (e.g., money problems) and personal factors identified by the T-JTA. As a function of the intervention, the treated group showed a significant decline in AWOL rates while the control group did not. Results were discussed in terms of the efficiency of employing the Taylor-Johnson Temperament Analysis in conjunction with peer counseling to reduce AWOL rates.

Who are you? Wouldn't you like to be authentic? "INSIDE INSIGHT!" By the time you finish reading this book, YOU will be a NEW PERSON! Most people have no idea what they want. Then again, for that matter, who they are. That is causing a world of hurt. The outcome from Dr. Worley is a ground-breaking psychometric assessment, Worley's ID Profile (WIDP). WIDP used with overwhelmingly positive reviews by corporate leaders, HR Departments, clinicians, churches, schools, sports teams, families, and individuals. In this book, Dr. Worley speaks about how he developed WIDP, why it is radically different from other profiling systems, and how you can use it to help align your outer persona and behavior with your inner expectations. WIDP concretely identifies what you "prefer and do not prefer from others." This crucial proof will help enhance your quality of life, and "You will see yourself on the pages of your profile." Having completed thousands of profiles I ALWAYS get responses like, "WOW, how can you get this much information from those questions?" or "I can't believe how accurate this is about me!" or "I wish I had this information when I was younger!" or "I want to profile my whole family." Let's say you are one of those individuals that have always felt uncomfortable being around many people and don't like to socialize. GUESS WHAT? Most of society is like that! That is why no one talks on elevators or in doctor's offices. It just happens to be your unique temperament. It is "OK" for you to feel that way because that is who you are so, leave yourself alone and enjoy the recluse life. You are one of those people who live in their head, thinking, creating, dreaming and inventing ideas. Most people go through life not being able to identify with their true inner desires. You are one of a kind, unique person and that makes you very special. Then there is the temperament that has the innate desire always to be leading others, making decisions, and being in control. They are natural-born leaders and, like cream in milk, will always rise to the top of an organization. You are naturally gifted as a leader and have innate ability to lead armies. If you cannot lead where you are, you will move to another position. You will be anxious until you land in a governance spot. Once you find that position, you will be fulfilled. Then there are the peacemakers, servants, and cheerleaders! The peacemakers balance out everyone and maintain harmony. They are great arbitrators and have a comedy streak. The servants are loyal and committed to working until the task is completed. They are proficient and quiet. They are invaluable. The cheerleaders are the socialites who make the world exciting and fun. Without them, life would be boring. We need them, and they want all of us to be open to them and to be their friends. They are very colorful and expressive and, very open in their communications. We're different! Appreciate your temperament. You are VERY important! Expect miracles.
